

## It's About Performance

Whether relaxed indoors or miles away from home, knowing your house is safeguarded against the most extreme weather conditions provides an important sense of security. From the searing heat of summer to the bitter winds of winter, to unforgiving thunderstorms or just an enthusiastic little leaguer, Satinwood Siding provides everyday peace of mind.

The reality is there are many siding options on the market today, and while most look great when first installed, time is the test that many fail. Within years, painting or staining is often required to maintain an acceptable appearance. But, Satinwood offers a siding option that will look beautiful with minimal attention, providing unparalleled performance benefits for an attractive *and* durable exterior that stands the test of time.

### Resistance to Hurricane-Force Winds.

Independently tested to withstand hurricane-force winds, with wind force exceeding 160 mph.

### Impact Resistant.

Constructed of roll-formed 29 gauge G-90 galvanized steel, providing exceptional strength and impact resistance.

### Class A, Non-Combustible.

Unlike many other siding options, steel is a non-combustible product, meeting even the most stringent building codes.

### Deters Insects.

Resists damage from wood eating insects such as termites.

### Maintenance Freedom.

A simple rinse with a garden hose is usually all that's required to maintain that just-installed beauty.

### Peace of Mind.

Backed by a lifetime, transferable warranty\* by an industry-leading manufacturer.

\*See product warranty for details.

## Making A Decision

From color to style to application, the possibilities for perfection are infinite. Making an informed choice to transform your home with steel siding from *The Alside Steel Collection* is truly an enduring gift to you . . . from you.

### A Lifetime by Your Side

Satinwood Steel Siding is backed by a lifetime limited transferable warranty including a 50 year hail protection guarantee. See warranty for product details. A copy of our warranty can be obtained by writing to:

## It's About Life's Choices

*And that includes the life of your most important investment: your home.*

The first step in the creation, renovation and preservation of your home involves choosing the right products. By choosing Satinwood Steel Siding, you've selected the finest steel siding available – and opened the door to the collection's wide variety of styles and color choices for your home.

Whether you select 5" Dutch Lap steel siding in a peaceful hue of Cape Cod Gray or 12" Board and Batten in rustic Walnut, whether it will be applied on your house in the suburbs, a secluded ranch in the mountains or vacation home at the lake, picture the distinct and lasting impression you create once you choose Satinwood Steel Siding. Beauty and endurance, coupled with strength and dependability, all combine to paint a portrait of your home that will reflect your unique personality and lifestyle.

## Making A Difference

Whether you're selecting Satinwood Steel Siding to renovate your existing home, or for use in building a new one, you'll find the products' high-quality and low maintenance finish an attractive and welcome relief. Add to that our architecturally pleasing profiles and structurally sound construction, and you're siding your home with the premium features and reliability found only with an industry leader – Alside.

Board and Batten

*The Alside Steel Collection* provides a wide array of steel siding products to accommodate even the most discerning palette. As a part of this collection, eleven contemporary color selections have been artfully chosen – each is part of the Alside ColorConnect® Color Matching System, which allows you to coordinate your siding with other Alside exterior products and accessories. With your individual preference in mind, three unique profiles have been expertly designed and finished to reflect the natural grain of traditional wood siding.

Satinwood Steel Siding is constructed of galvanized steel and fused with a top coat of PVC – a process which adds lasting integrity to your home. The low-gloss finish and color-fast texture lend appeal, and capture the warmth of freshly painted wood, yet requires only minimal attention. Satinwood Steel Siding will deliver optimal performance year after year.
